SUMMARY

Software Engineer with 2+ years of experience designing and building scalable web applications using Next.js, React, TypeScript, Node.js, GraphQL, and MongoDB. Contributed to the development of a student management platform serving 200+ active users and supporting critical academic workflows. Experienced across the full software development lifecycle, including system design, API development, database architecture, cloud deployment, CI/CD automation, and performance optimization.

Strong problem-solving skills demonstrated through continuous algorithm practice and hands-on experience delivering production-ready software. Passionate about building reliable systems and growing into high-impact engineering roles at world-class technology companies.

EXPERIENCE

Software Engineer

2024 – 2026

Pinecone Academy

- Developed and maintained a production student platform used by more than 200 active users, improving accessibility and efficiency for academic operations.
- Built scalable frontend applications using React, Next.js, and TypeScript, delivering responsive and maintainable user experiences.
- Designed and implemented GraphQL APIs and backend services to support complex business workflows and data management requirements.
- Created and optimized database schemas, improving data organization and application performance.
- Automated manual operational processes through workflow automation and scheduled jobs, reducing repetitive administrative tasks.
- Collaborated within an Agile team of 5 engineers, participating in sprint planning, code reviews, and technical discussions.
- Managed CI/CD pipelines and deployment workflows, ensuring reliable releases and minimizing production issues.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL

Frontend: React, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, GraphQL, REST APIs, Authentication & Authorization

Databases: MongoDB, SQL, Cloudflare D1

Cloud & Infrastructure: Cloudflare Workers, Vercel, CI/CD Pipelines

Tools: Git, GitHub, n8n, Cron Jobs

Computer Science: Data Structures, Algorithms, Object-Oriented Programming, System Design Fundamentals

ACHIEVEMENTS

- Built and deployed multiple production-grade full-stack applications using modern web technologies. - Consistently practice algorithmic problem-solving through LeetCode and technical interview preparation. - Demonstrated strong self-learning ability by mastering modern frameworks and cloud technologies without a traditional computer science degree.
